

BOSE Wave System Radio/CD

Wave® music system

- Ideal for home or office listening
- CD player, FM/AM tuner, headphone jack, alarm clock
- Convincing sound and impressive lows, especially for its size
- Contemporary design with all controls on convenient remote

The acclaimed Wave® music system still sets the standard for quality audio and ease of use among one-piece, table top radios and bookshelf stereos. Its award-winning design adds a touch of distinction to almost any room. It's no surprise so many people use it as their main home entertainment system for music listening.

Bose® technology at work

Unique Bose innovations account for this compact Wave system's hearty sound. Proprietary [waveguide speaker technology](#) combines with other Bose technologies to deliver performance well beyond the speakers' size. *Forbes FYI* says, "you'll think you're listening to a ... system that costs five times more."

Simplicity by design

The Wave® music system was engineered for easy enjoyment, right out of the box. No setup required: just plug it in and you're ready to go. The FM/AM radio and CD player are built in. There's an auxiliary input for your MP3 or other portable player, and a headphone jack for keeping the music to yourself.

The system's sleek appearance is uninterrupted by buttons, with all controls on a handy, [slim remote](#). The large display panel is brightly lit and easy to read, prominently displaying the artist, title and album names of your MP3 CDs.
